

Using the Seal of Accreditation

The official Seal of Accreditation was specifically designed for use by facilities accredited in MRI. You may use this seal on your accredited facility's letterhead, website, reports or other published materials as an acknowledgement of your accreditation status.

The IAC now offers the Seal of Accreditation to accredited facilities in color and black and white. The color version works best for web use and printed materials, while the black and white version will generate best on documents, reports, etc. This zip file contains four different formats (jpg, gif, tif and eps) of the official Seal of Accreditation, designed specifically for use by facilities accredited in MRI. The jpg and gif files are formatted for the web and online use. The eps and tif files are high-resolution and are best used in printed items. The eps file is meant for use in professional print jobs and cannot be opened without the proper software.

Please note: The enclosed seal is the only logo that the IAC has made available for use by facilities accredited in MRI. It must be printed in its exact form; only changes in size are permitted. The official IAC logo without the corresponding words 'Accredited Facility – MRI' is intended solely for IAC purposes and its use remains prohibited.

Congratulations on achieving IAC accreditation in MRI. Please feel free to contact the IAC should you need any further assistance. To learn more about promoting your lab's accreditation, please visit www.intersocietal.org/mri/accredits/promoting_accreditation.htm. For further questions on the Seal of Accreditation, please e-mail marketing@intersocietal.org.
